Contraceptive conversations beyond the pill.

This interactive, case-based session will provide a refresher on the contraception options available and practical tips for the contraception consultation.

Designed for GPs in Training, International Medical Graduates and New Fellows wanting a refresher, this session covers:

- The pros and cons of available contraception options
- Tailoring contraception to your patient demographic
- Taking a female gynae and sexual health history

This workshop is delivered in a small-group setting, offering the opportunity to ask questions in a safe space and reflect and discuss common and not-so-common consultations with your GP colleagues.

Learning outcomes

1. Discuss the pros and cons of at least five contraception options available to female patients
2. Explain how to tailor contraception to a specific patient demographic
3. Outline best practice for taking a female gynaecological and sexual health history
